

Daily Standup Meeting 1 with Client

Fri, 04 Sept 26

Daily standup with client (Jan). Meeting covered sprint 2 progress, rubric requirements, and next steps.

Updates

- Trello board updated with sprint 2 use cases, some completed and some in progress
- Issue tracker actively being updated with fixes and additions
- Calendar feature implemented locally, not yet pushed to main
- Offline/background sync planned but not yet implemented
- Coach and assistant coach roles confirmed for sprint 2; player role still under consideration

Blockers:

- League/fixture system unclear: need to confirm with Brendan whether all competing teams must exist in the system
- External API requirement was a surprise; team needs to review the sprint 2 rubric

Sidebar

- Jan suggested adding a player/athlete role so athletes can confirm availability for events
- Event creation should distinguish between friendly games and season/league competitions, which also affects statistics
- Jan clarified the external API requirement is rubric-based, not project-brief-based; suggested exposing player or team statistics as a public endpoint
- User feedback counts for 10% of marks; Jan noted teams have historically used internal Google Forms to simulate 60 user responses

Action Items

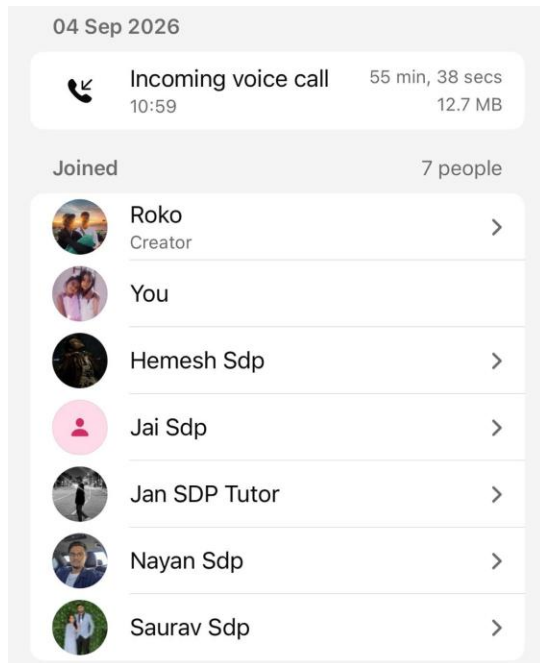

- Team to speak to Brendan about the league/fixture system and whether external teams need accounts
- Team to review the sprint 2 rubric, specifically the external API section
- Team to plan an approach for user feedback collection (Google Forms or real users)

- Next check-in scheduled for Sunday or Monday when Jan returns

Proof of Meeting:

Meeting commenced at 10:59 on 04/09/2026
